

ABOUT PHIONIKE

We design with **purpose**. We build for **impact**.

We partner with ambitious businesses to create products, brands and experiences that solve meaningful problems through strategy, design and technology.

OUR PHILOSOPHY

Built on values, not trends

People First

People always come before products, profits or opinions. We challenge assumptions, ask better questions and design for the people who will ultimately use what we create.

Design with Integrity

Integrity isn't a value we aspire to—it's the foundation of every decision. We communicate honestly, design responsibly and always do what's right for the user and our partners.

Partnerships Over Projects

We don't believe in transactional relationships. We work alongside our clients, celebrate their successes and navigate challenges together as one team.

Stay Curious

Curiosity drives innovation. We continuously explore new ideas, emerging technologies and better ways to solve problems while never losing sight of the people we're designing for.

Build with Purpose

We embrace experimentation, iterate fearlessly and aren't afraid to challenge convention. Every idea, no matter how bold, must solve a real problem.

Design for Everyone

Accessibility and inclusivity are fundamental—not optional. We believe great design is usable, equitable and representative of the diverse people it serves.

MEET THE TEAM

The people behind the products you love

Marcus Thorne

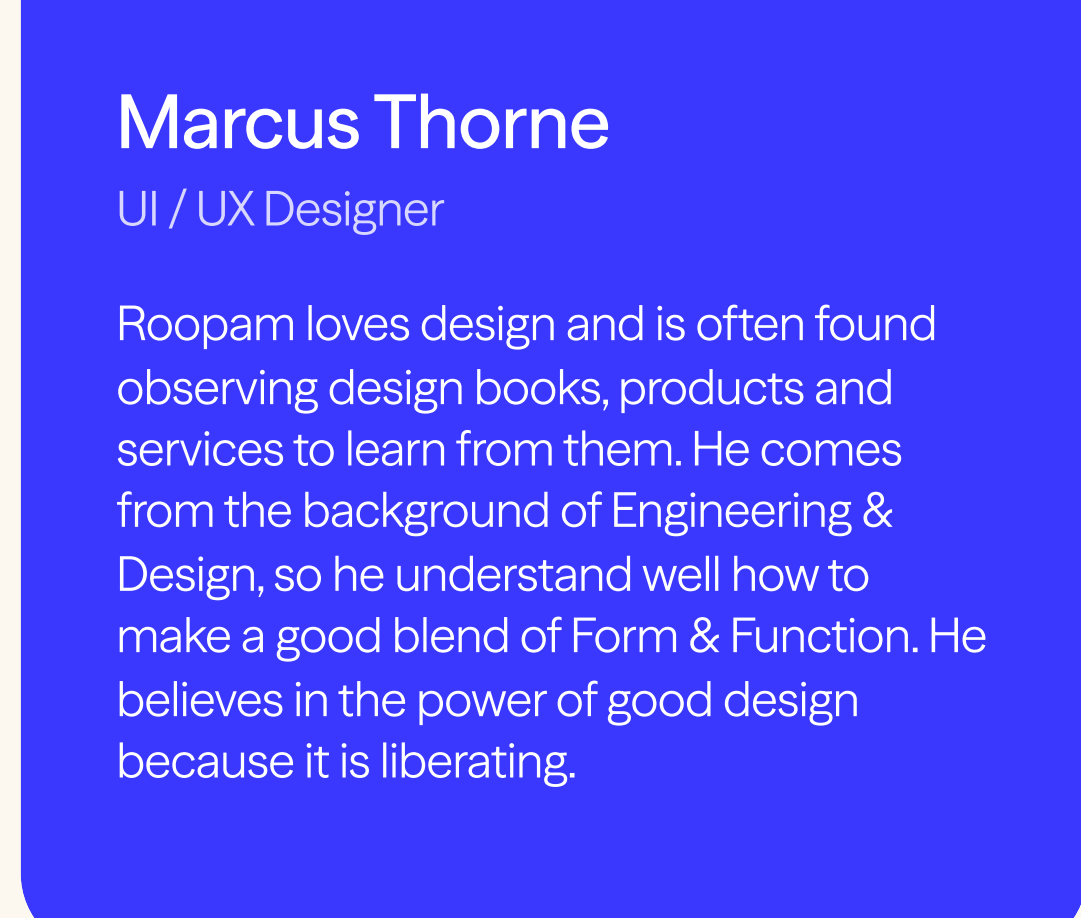

UI / UX Designer

Roopam loves design and is often found observing design books, products and services to learn from them. He comes from the background of Engineering & Design, so he understand well how to make a good blend of Form & Function. He believes in the power of good design because it is liberating.

OUR CULTURE

Life at Phionike is *a balance of rigor and play*

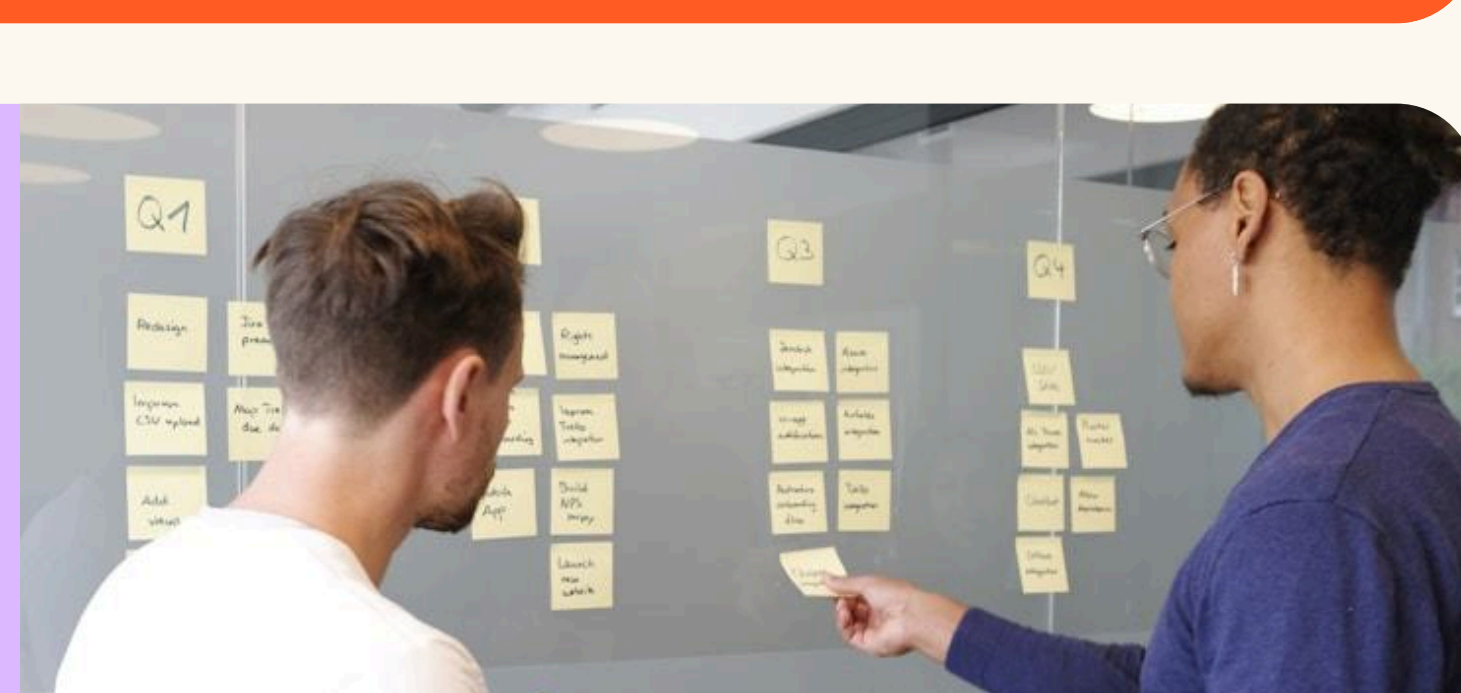

We Learn Together

Every project teaches us something new. We encourage experimentation, knowledge sharing and exploring better ways to solve problems.

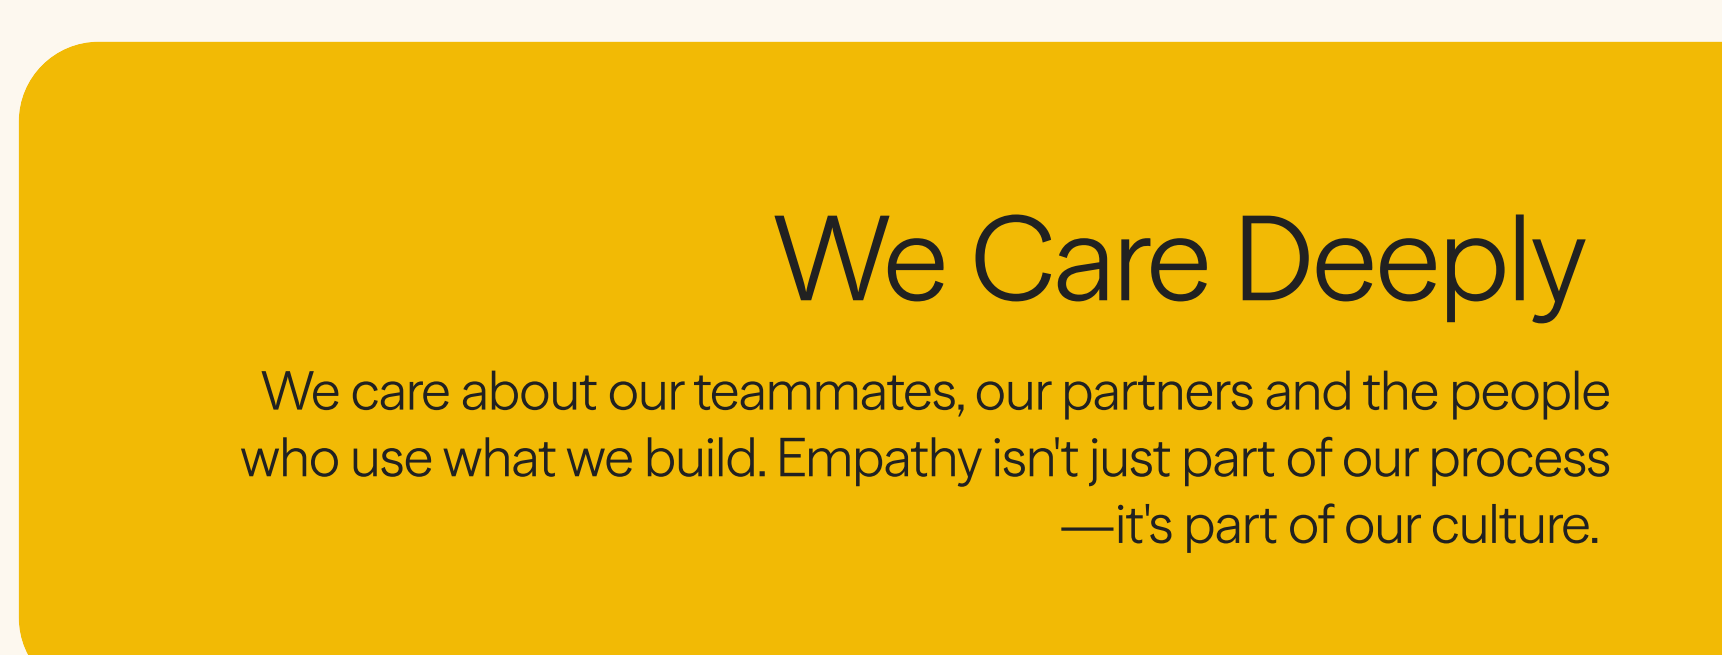

We Build Together

Design is never a solo effort. We collaborate across disciplines, challenge ideas respectfully and celebrate every milestone as one team.

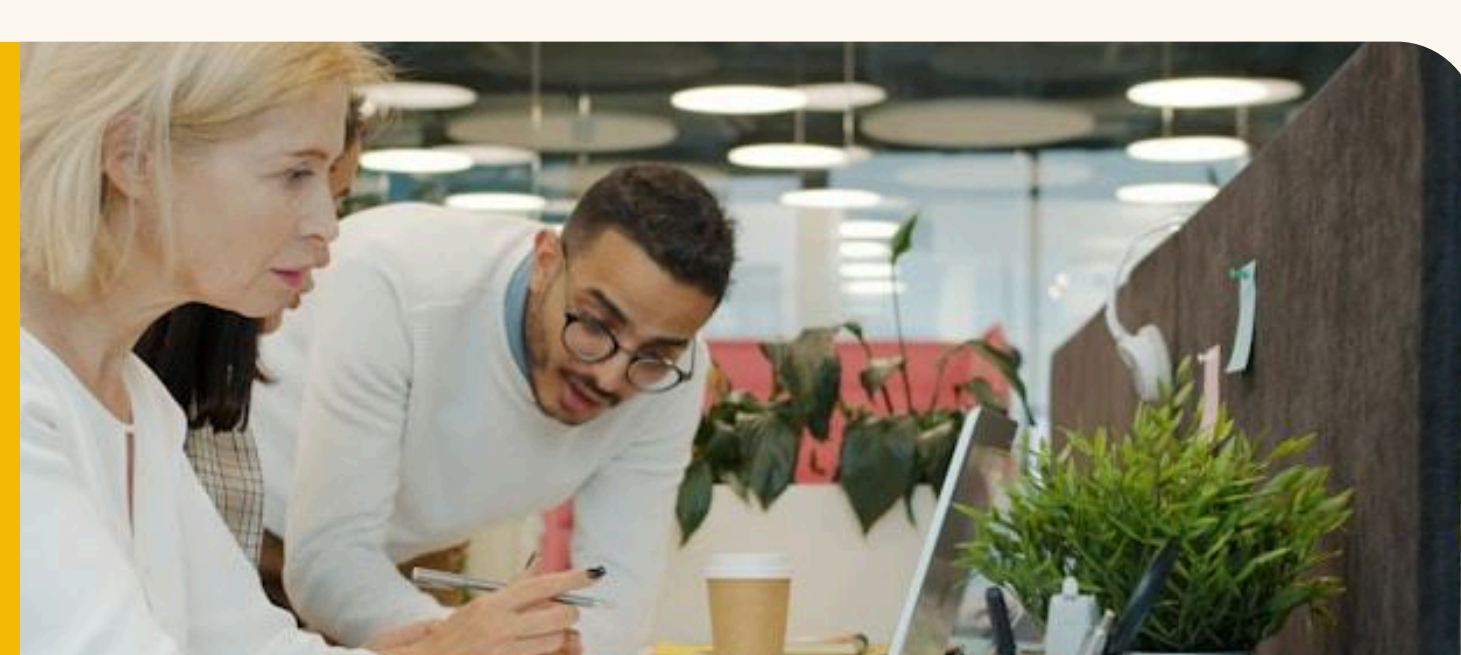

We Grow Together

Growth isn't measured only by projects delivered, but by the people we become. We invest in learning, mentorship and creating opportunities to improve every day.

We Care Deeply

We care about our teammates, our partners and the people who use what we build. Empathy isn't just part of our process—it's part of our culture.

READY TO WORK TOGETHER?

Have a project in mind? *We'd love to hear about it.*
